

RO Units

STERI

Clinical quality water from mains water whenever you want it.

For Podiatry, Doctors, Dentists & Veterinary Practices

- Save buying expensive bottled water
- Stop having to carry heavy bottles back to your clinic
- Eliminate expensive deliveries
- Available as wall or trolley mounted unit
- Can be incorporated into our range of sterilisers

RO Trolley

The trolley mounted unit frees up much needed benchtop space for other equipment. It is designed to incorporate most models of steriliser and has plenty of storage space. All waste water is automatically pumped to a drain during the steriliser cycle, negating the need for stand-alone tanks. The unit also has a tap conveniently placed on the top shelf for other uses in the practice.

* Steriliser not included

RO Wall Mounted Unit

The wall mounted unit provides an ideal way to have your own RO unit when there is limited space. The water is delivered through a tap situated on the bottom corner. Also suitable for cupboard mounting.

STERI Combi - for the large practice

The Steri Combi is a unique system of automatic washer disinfector and steriliser complete with validation printer and its own RO water treatment unit providing clinical quality water.
