

Validator - printer

STERI

Your own complete validation system which produces a permanent record for you and your patients safety

Designed for installation on bench top sterilisers in doctors, dentists, chiropodists and veterinary practices

Can be retrofitted to other makes of sterilisers

Accountability is now a must in the NHS and PCT's. Our validator is designed to be a completely independent monitoring system that is unique in its design and has the following features:-

- Design negates any intrusion into existing steriliser electronic controls
- Monitors both temperature and pressure to HTM 2010
- Low noise printer
- PC control of set up data
- Displays when next service or calibration is due
- Cost effective design
