

SLUICE ROOM CHECKLIST

SLUICE ROOM CHECKLIST

PLANNING

- Number of sluice rooms** - The number of sluice rooms needed will depend on the size and layout of the facility
- Equipment** - The required equipment to meet regulations and stay compliant. Please refer to the equipment checklist
- Location** - A sluice room may be used 24/7, so a site should be chosen where noise from water or clattering hardware will not be a nuisance
- Materials** - Stainless steel is an extraordinarily strong and durable material and is able to be cleaned easily
- Accessibility & Layout** - The room needs to be easily accessible and the layout needs to ensure there is no possibility of cross contamination

BUILDING

- Hot and cold water inlets
- Power supplies and voltages
- Soil outlets and vents
- Floor and wall finishes
- Adequate ventilation

SLUICE ROOM CHECKLIST

EQUIPMENT

- Bedpan washer disinfector*
- Sluice sink/slop hopper, this can also be achieved by using a modern washer disinfector offering this functionality
- Handwash basin with automatic or elbow lever taps*
- Utensil drying rack*
- Push or foot-operated soap dispensers
- Hand towel dispenser
- Clean storage areas i.e. cupboards, shelves
- Stainless steel work surfaces
- Reusable utensils such as bedpans, commode pots and urine bottles
- Waste bin
- Air steriliser unit

*Minimum equipment required to achieve compliance.

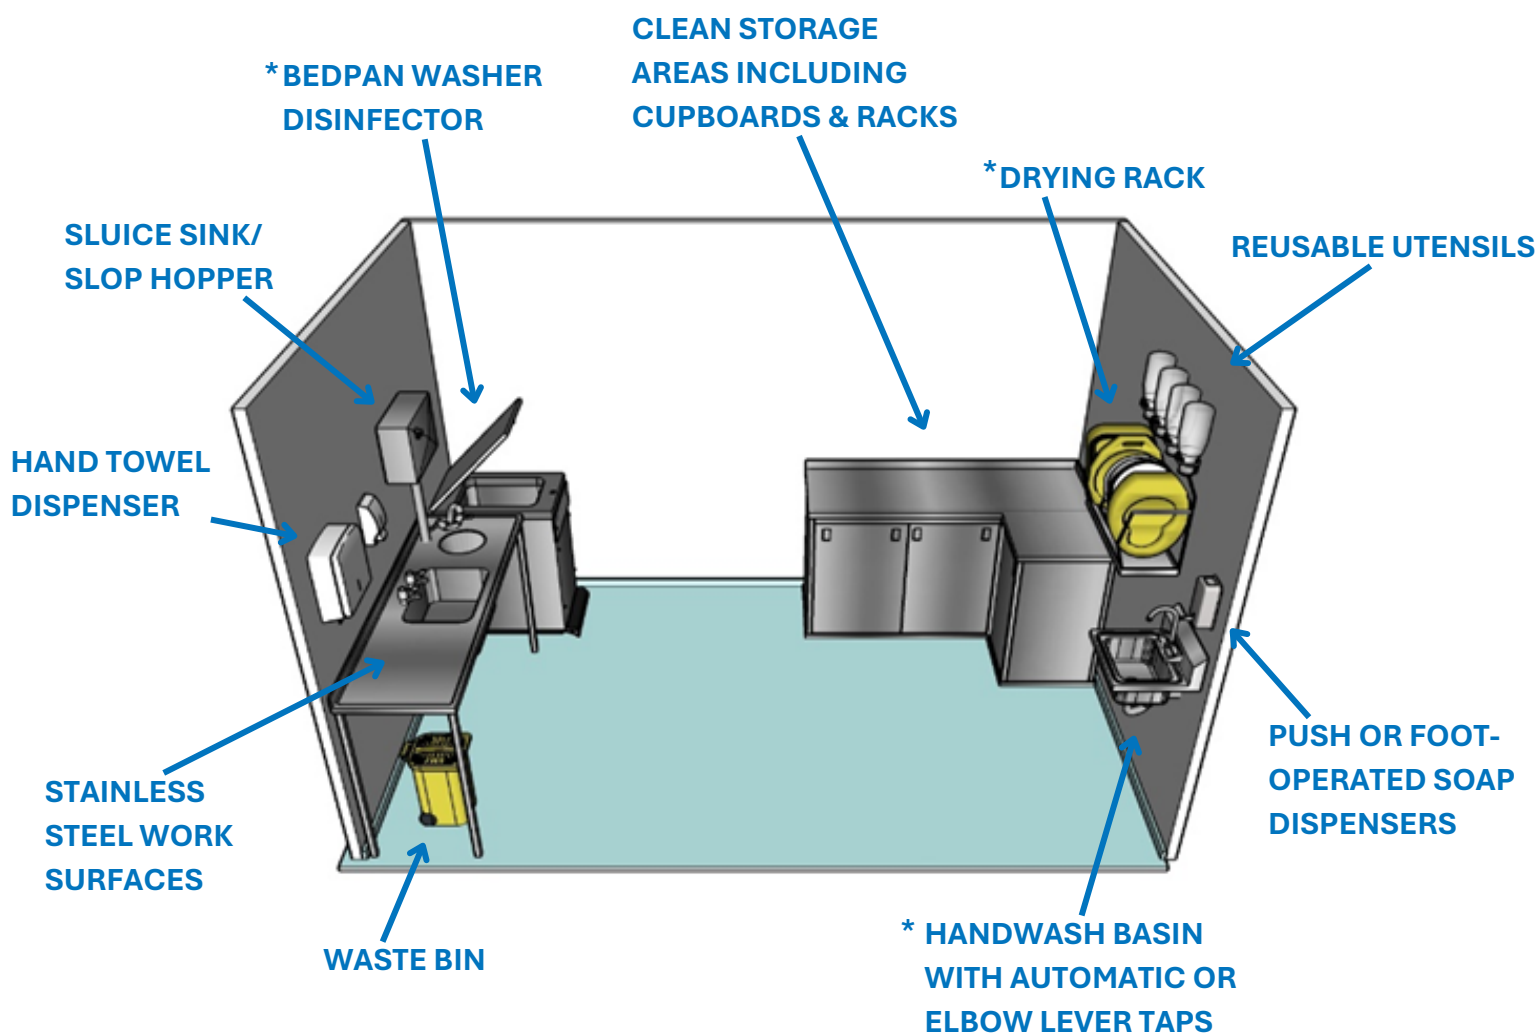

We feel very privileged to have a long standing relationship with Stanbridge. Our engineers will always recommend Stanbridge's products to our customers as they find them to be of a very high quality and consistently reliable. In addition their customer services are second to none and staff are always on hand to trouble shoot any problems without any delay, which is a crucial asset in this industry. We look forward to working together for many more years to come.
